

Edison Summer Extravaganza

Technology Day Camps

Especially
for
Edison Kids!!!

- Small group! Limited to 12 kids, entering grades 3rd-6th
- Close to home! Held at Edison, Monday - Friday, 9 am - 12:30 pm
- Experienced leader! Kirsti Haugen has led technology-oriented classes, camps and activities for kids and adults at Edison and other schools for over 15 years. You may reach her by phone (517-7471) or email (haugen@4j.lane.edu)
- On the Web! Learn more at EdisonExtravaganza.wikispaces.com

Busy parents, do you need more time?

Following camp, we'll provide an escorted walk to University Park, where the City of Eugene hosts Fun for All, a free program where your child can enjoy activities in the park, supervised by Parks and Rec staff until 5:30 pm

July 20-24, 9 am - 12:30 pm • LEGO-MANIA!

Come explore EVERYthing Lego!® We'll build with Legos,® of course, but you'll also have chances to:

- Use (free) Lego® software to design your own models and instructions
- Explore web sites where you can find others' designs and share your creations, too.
- Pick a project: Create a group Lego® web site, make a book or movie about Legos,® or maybe even build your own Lego® USB jump drive!

We'll designate some days to bring in your own models to display, but otherwise, leave your Legos® at home (and leave our Legos® at camp ☺).

July 27-31, 9 am - 12:30 pm • EDISON STUDENT PUBLISHERS!

Create the first-ever back-to-school edition of our student-published paper, The Edison Light Bulb, in print and online! Write news, fiction, interviews, comics, and more! Add photographs and illustrations. Meet and interview a local journalist. We'll also learn some web skills to create an online edition. And, we'll venture into the community to do interviews, surveys, ads or investigative reporting. Our instructors will provide the tools and support. YOU bring your great ideas, enthusiasm and creativity!

August 3-7, 9 am - 12:30 pm • STOP MOTION ANIMATION!

Learn how to animate Legos,® clay, drawings you create on the computer or by hand, & more, using digital photos you take and software like iMovie,™ Animation-ish,™ Scratch™ and iStopMotion.™ Then add dialog, sounds, effects and titles. By the end of the week, we'll produce a DVD for all to keep with all the movies we make, and hold a public screening Friday at noon! Bring your own digital camera, tripod, accessories, etc., or use ours. You're also welcome to use our props (clay, magnets, Legos,® artwork, etc.) or bring your own. We'll guide you through making a digital movie using stop motion techniques. We'll also share other animation techniques and provide motivated students the opportunity for independent exploration with additional tools.
